

# WAX RECOMMENDATION **TOKO**<sup>®</sup>

## Red Barn Rendezvous

Osceola Ski and Sport, Camden, NY

Saturday, January 13

11 A.M.

10K and 5K, Classical technique

Mass Start

<https://www.skireg.com/red-barn-rendezvous-deux>

**Forecast/Conditions:** Overnight low 33, temperature at start 37, solid base of newly fallen snow. Occasional rain overnight, turning to steadier rain by race time.

**Glidewax:** Apply High Performance Yellow Hot Wax, scrape and brush. Spray on High Performance Yellow Liquid Paraffin, let stand at least two hours, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, apply HP Yellow Hot Wax, scrape and brush.

**Gripwax:** Apply a light layer of Nordic Base Klister Green, smooth out. Then apply Nordic Klister Yellow, smooth out and let cool.

**Structure:** A wet structure covered by one pass with the Yellow Structurite tool after scraping and brushing the final Hot Wax or before spraying HP LP will best suit these conditions.

Check the [Wax Tips](#) page at [TokoUS.com](http://TokoUS.com) before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at [TokoUS.com](http://TokoUS.com).
