

WAX RECOMMENDATION **TOKO[®]**

Wisconsin Biathlon Race #3

McMiller Sports Center, Eagle, WI

Saturday, January 20

9 A.M. Zero, 9:45 A.M. Briefing

10 A.M. 10K Open/5K Junior Race Start

Interval starts

Laps TBD

<http://www.webscorer.com/register?raceid=339786>

Forecast/Conditions: Friday night low in the single digits below zero F. Expect fresh sharp snow that will speed up with ski traffic and sunny conditions. Race time temperatures will be in the single digits above zero F.

Glidewax: Apply High Performance Blue Hot Wax, sprinkle on X-Cold Powder, iron in together, let cool, scrape and brush. Sprinkle on HP Powder Blue, iron in, let cool, scrape and brush. If you do not have HP Powder Blue, apply BP Blue Hot Wax, scrape and brush, then apply HP Blue Hot Wax, sprinkle on X-Cold Powder, iron in together, let cool, scrape and brush.

Gripwax: N/A

Structure: A fine linear structure covered by one pass with the Blue Structurite tool after scraping and brushing the final Hot Wax/Powder will best suit these conditions.

Created by Ben Lund, Toko Tech Team member since 2000.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
