

WAX RECOMMENDATION **TOKO[®]**

First Chance Race

Vasaloppet Nordic Center, Mora, MN

Saturday January 6

1 P.M.

5K/10K, Freestyle

Self-seeded mass start - multiple lap course

<https://vasaloppet.us/first-chance-race/>

Forecast/Conditions: Overnight low of 28 rising to 31 at the start. A 60 percent chance of snow beginning at midnight through the races, with 1-2 inches of accumulation on top of a manmade course. Overcast with a slight wind from the south.

Glidewax: Apply High Performance Red Hot Wax, scrape and brush. Spray on HP LP Yellow, let stand at least 2 hours, then polish with the Liquid Paraffin Polishing Brush. If you do not have LP spray, apply BP Blue Hot Wax, scrape and brush, then apply HP Yellow Hot Wax, scrape and brush.

Structure: A fine or universal structure covered by one pass with the Yellow Structurite tool after scraping and brushing the final Hot Wax or before spraying HP LP will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
