

WAX RECOMMENDATION **TOKO[®]**

Biathlon IMD Race

Soldier Hollow, Midway, UT

Sunday, January 28

9 A.M. Zero, 10 A.M. Race

4.5K, Skate

<https://utaholympiclegacy.org/event/super-qualifier/>

Forecast/Conditions: Overnight low 25, temperature at start 30. Daytime high 47, partly cloudy, wind 5 mph, zero percent chance of new precipitation. This fast hard transformed snow loves the Toko Red structure.

Glidewax: Apply High Performance Red Hot Wax, scrape and brush. Spray on High Performance Red Liquid Paraffin, let stand at least 2-4 hours, then polish with the Polishing Brush. If you do not have LP spray, apply BP Red Hot Wax, scrape and brush, then apply HP Red Hot Wax, scrape and brush.

Structure: A wet or universal structure covered by one pass with the Red Structurite tool after scraping and brushing the final Hot Wax or before spraying HP LP will best suit these conditions.

Racing - Service

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
