

WAX RECOMMENDATION **TOKO[®]**

Spud Chase

Teton Reserve Golf Course, Victor, ID

Saturday, January 20

10 A.M.

22K, 11K, 7K, 3K, Skate

Wave starts based on distance, 1 or 2 laps

<http://tvtap.org/events>

Forecast/Conditions: Overnight low 30, temperature at start 34, 50 percent chance of light rain/snow mix Saturday morning. Expect a moderately firm track and moist snow conditions with glazing in the track.

Glidewax: Apply High Performance Red Hot Wax, scrape and brush. Spray on HP LP Yellow, let stand at least 2 hours, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, apply BP Blue Hot Wax, scrape and brush, then apply HP Yellow Hot Wax, scrape and brush.

Gripwax: N/A

Structure: A universal structure covered by one pass with the Red Structurite tool after scraping and brushing the final Hot Wax or before spraying HP LP will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
