

WAX RECOMMENDATION

TOKO[®]

Wisconsin Biathlon Race #7

Ariens Nordic Center, Brillion, WI

Sunday, February 18

10 A.M. Zero

11 A.M. Open & U15/U13 Race

Noon Novice Race

Mass starts

Laps & loops TBD but between 8K-12K total distance

<http://www.webscorer.com/register?raceid=342378>

Forecast/Conditions: Expect an overnight low around 20. Expect race time temperature around 30. The trail is in excellent condition with a mix of freshly shot and older manmade snow. Expect it to be firm but break up slightly with lapped traffic.

Glidewax: Apply High Performance Blue Hot Wax, scrape and brush. Then sprinkle on HP Powder Red, iron in, let cool, scrape and brush. If you do not have HP Powder, apply BP Blue Hot Wax, scrape and brush, then apply HP Red Hot Wax, scrape and brush.

Gripwax: N/A

Structure: A universal structure covered by one pass with the Red Structurite tool after scraping and brushing the final Hot Wax/Powder or before spraying HP LP will best suit these conditions.

Created by Ben Lund, Toko Tech Team member since 2000.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
