Sunday, March 3

9 A.M. 50K Skate, multiple start times until 1 P.M.

Mass starts by distance/technique

Point-to-Point race finishing at Kincaid Park

[Tour of Anchorage website](#)

Forecast/Conditions: Lots of snow this year. Top surface is week-old snow that was sun affected and then windblown. Machine grooming will make good trails but will be old snow with some debris. Wind, cold and only partial sun will make for consistent temperatures all day. Overnight low -5F, temperature at start 5F-10F. Finish temps near 10F.

Glidewax: Apply High Performance Blue Hot Wax, scrape and brush. Sprinkle on HP Powder Blue, iron in, let cool, scrape and brush. If you do not have HP Powder, apply BP Blue Hot Wax, scrape and brush, then apply HP Blue Hot Wax, scrape and brush.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 3-4 layers of Nordic GripWax Blue, corking between layers.

Structure: A fine structure covered by one light pass with the Blue Structurite tool after scraping and brushing the final Hot Wax/Powder will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
