

# WAX RECOMMENDATION **TOKO**<sup>®</sup>

## **Kongsbergers Stampede**

Cabin Creek Exit 63 Hwy 90, Snoqualmie Pass, WA

Sunday, February 18

9 A.M,

5K/10K, Skate

Wave start, 5K loop

<http://www.kongsbergers.org>

**Forecast/Conditions:** A 60 percent chance of wintery mix falling Saturday night with a low of 27, rising to 33 at the start and 35 at the finish. A 70 percent chance of the wintery mix continuing through the event. It will fall on a mostly transformed 23" firm base.

**Glidewax:** Apply High Performance Red Hot Wax, scrape and brush. Spray on High Performance Yellow Liquid Paraffin, let stand at least 2 hours, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, apply BP Red Hot Wax, scrape and brush, then apply HP Yellow Hot Wax, scrape and brush.

**Gripwax:** N/A

**Structure:** A universal structure covered by one pass with the Yellow Structurite tool after scraping and brushing the final Hot Wax or before spraying HP LP will best suit these conditions.

Check the [Wax Tips](#) page at [TokoUS.com](http://TokoUS.com) before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at [TokoUS.com](http://TokoUS.com).
