

WAX RECOMMENDATION **TOKO®**

Bryce Canyon Ski Festival Archery Biathlon

Ruby's Inn, Bryce Canyon City, UT

Sunday, February 18

11 A.M.

Archery biathlon ski race, Freestyle technique

<https://www.rubysinn.com/bryce-canyon-winter-festival/>

Forecast/Conditions: Overnight low 23, temperature at start 36, partly cloudy. Course has been groomed a few times this week and no new snow is expected Friday or Saturday, so expect firm conditions.

Glidewax: Apply High Performance Blue Hot Wax, scrape and brush. Sprinkle on HP Powder Red, iron in, let cool, scrape and brush. If you do not have HP Powder, apply BP Blue Hot Wax, scrape and brush, then apply HP Red Hot Wax, scrape and brush.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply one layer of Nordic GripWax Yellow, cork smooth and then apply two layers of GripWax Red, corking between layers. If using skin skis, treat skins with Eco Skin Proof the day before the event.

Structure: A universal structure covered by one pass with the Red Structurite tool after scraping and brushing the final Hot Wax/Powder will best suit these conditions.

Racing - Service

Check the [Wax Tips](#) page at [TokoUS.com](https://www.toko-us.com) before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at [TokoUS.com](https://www.toko-us.com).
