

WAX RECOMMENDATION **TOKO**[®]

American Birkebeiner Skate Wave 3-10

American Birkebeiner Trailhead, Cable, WI

Saturday, February 24

1 P.M. 30K Skate

10K loop

<https://www.birkie.com/>

Forecast/Conditions: Overnight low of around 8F with a daytime high in the upper 30s. Start time temperature will be in the low to mid-30s under mostly sunny skies. The track will be a machined base of manmade snow. Expect the track to become softer as more skiers ski the course, with dirty snow at road crossings and other areas.

Glidewax: Apply Base Performance Blue Hot Wax, scrape and brush, then apply High Performance Blue Hot Wax, scrape and brush. Spray on HP Liquid Paraffin Red, let stand overnight (overnight will yield a more dirt-resistant finish), then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, apply BP Blue Hot Wax, scrape and brush, then apply HP Red Hot Wax, scrape and brush.

Gripwax: N/A

Structure: A universal structure covered by one pass with the Red Structurite tool after scraping and brushing the final Hot Wax layer and before applying HP Liquid Paraffin will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
