

WAX RECOMMENDATION **TOKO®**

Boulder Mountain Tour

Harriman Trail, Ketchum, ID

Saturday, February 3

10 A.M

34K/15K, Skate, Wave start, Point-to-point

www.bouldermountaintour.com

Forecast/Conditions: Friday night low of 20 with some light rain/snow mix falling early. Saturday expect about 1 inch of snow to fall during the event and a light breeze (6-8 mph). With no new snow, HP Red with Red structure covered by HP LP Red would be our recommendation. However, with light falling dry snow that we are expecting to accumulate about 1 inch, our wax tip is to play it safe and wax for the expected light falling snow which should be the prime factor in determining the skis' speed.

Glidewax: Apply Performance Blue Hot Wax, scrape and brush. Sprinkle on HP Powder Blue/HP Powder Red mixed 1:1, iron in, let cool, scrape and brush. If you do not have HP Powder, apply Performance Blue Hot Wax, scrape and brush, then apply HP Blue Hot Wax/HP Red Hot Wax mixed 1:1, scrape and brush. If it snows avoid the HP LP products. (This is true only for Intermountain area races with accumulating new snow.)

Structure: One pass of the Red Structurite tool BEFORE hot waxing with the final HP layer. Then hot wax, cool, scrape and brush. This will minimize the Red structure but still be about right if it snows. (If it does not snow and accumulate during race morning best would be Red structure applied as normal after scraping and brushing HP hot wax.)

Racing - Service

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
