Saturday, February 10

9 A.M.

30K/15K/5K, Classic, plus sit ski

Mass start, 15K lap

www.crosscutmt.org/events/dee-o-gee-crosscut-classic

Forecast/Conditions: Overnight low 16, temperature at start 24. Forecast of 2-4 inches of new snow in the days leading up to the event on top of a transformed base containing dirt in places. Mostly sunny during the event with a high of 27.

Glidewax: Apply High Performance Blue Hot Wax, scrape and brush. Sprinkle on HP Powder Blue and HP Powder Red mixed 1:1, iron in, let cool, scrape and brush. If you do not have HP Powder, apply BP Blue Hot Wax, iron in, scrape and brush, then apply HP Blue Hot Wax/HP Red Hot Wax mixed 1:1, iron in, scrape and brush.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 1 layer of Nordic GripWax Yellow followed by 2 layers of GripWax Red, corking between layers.

Structure: A universal structure covered by one pass with the Red Structurite tool after scraping and brushing the final Hot Wax/Powder or before spraying HP LP will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
