

WAX RECOMMENDATION

BKL Festival

Rikert Outdoor Center, Ripton VT

Saturday, March 2

9:45 A.M.

1K-2K, Classic Relay

Mass start by age group

1-2 laps

Forecast/Conditions: Overnight low of 31. Rain showers all day with the temperature rising to 41. Icy manmade snow with lots of water in it.

Glidewax: Apply Base Performance Red Hot Wax, scrape and brush. Then apply Base Performance Yellow Liquid Paraffin, let stand at least 1-2 hours, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, apply BP Red Hot Wax, scrape and brush, then apply BP Yellow Hot Wax, scrape and brush.

Gripwax: Roughen base with 150 grit sandpaper, apply Nordic Base Klister Green, heat and smooth. While still warm, apply Nordic Klister Red and Klister Yellow in an alternating chevron pattern, smooth, let cool.

Structure: A wet structure covered by one pass with the Yellow Structurite tool after scraping and brushing the final Hot Wax or before spraying BP LP will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
