

# WAX RECOMMENDATION **TOKO**<sup>®</sup>

## **BKL Festival**

Rikert Outdoor Center, Ripton VT

Sunday, March 3

9:30 A.M.

1K-4K, Skate

Interval start by age group

1-2 laps

Forecast/Conditions: Overnight low of 40 with rain showers. Mostly cloudy all day with the temperature rising to 53. Icy manmade snow with lots of water in it.

Glidewax: Apply Base Performance Red Hot Wax, scrape and brush. Then apply Base Performance Yellow Liquid Paraffin, let stand at least 1-2 hours, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, apply BP Red Hot Wax, scrape and brush, then apply BP Yellow Hot Wax, scrape and brush.

Gripwax: N/A

Structure: A wet structure covered by one pass with the Yellow Structurite tool after scraping and brushing the final Hot Wax or before spraying BP LP will best suit these conditions.

Check the [Wax Tips](#) page at [TokoUS.com](#) before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at [TokoUS.com](#).
