

# WAX RECOMMENDATION **TOKO**<sup>®</sup>

## **Bangtail Biathlon**

Crosscut Mountain Sports Center, Bozeman, MT

Sunday, February 4

9 A.M. Zero, 10 A.M. Pursuit start

Sprint, Skate

Laps ranging from 1K-2.5K

<https://www.crosscutmt.org/bangtail-biathlon>

**Forecast/Conditions:** Saturday overnight low of 28 with new snow accumulations of 3-5 inches. Temperature at start will be 30 with a high of 32 with overcast skies. Snow is expected to accumulate until noon.

**Glidewax:** Apply High Performance Blue Hot Wax, iron, scrape and brush. Sprinkle on HP Powder Blue, iron in, let cool, scrape and brush. If you do not have HP Powder, apply Performance Blue Hot Wax, iron, scrape and brush, then apply HP Blue Hot Wax, scrape and brush.

**Structure:** A universal grind covered with one pass of the Red Structurite tool BEFORE scraping and brushing the final Hot Wax/Powder will best suit these conditions.

Check the [Wax Tips](#) page at [TokoUS.com](https://TokoUS.com) before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at [TokoUS.com](https://TokoUS.com).
