

WAX RECOMMENDATION TOKO®

Snow Mountain Stampede

Snow Mountain Ranch Granby, Colorado

Saturday, March 9th

9 A.M.

50k, 25k, 12.5k Skate

Mass Start by Distance

12.5k loop

More info [Here](#)

Forecast/Conditions: Overnight low of 11F, air temps in the low 20's at start warming to the low 30's by race end. Expect extra soft track conditions due to the previous week of new snow and the possibility overnight snow.

Glidewax: Apply High Performance Blue Hot Wax, scrape and brush. Sprinkle on HP Powder Blue/Red mixed 1:1, iron in, let cool, scrape and brush. If you do not have HP Powder, apply HP Blue Hot Wax, scrape and brush, then apply HP Blue/Red mixed 1:1 Hot Wax, scrape and brush.

Gripwax: N/A

Structure: A fine structure covered by one pass with the Blue Structurite tool after scraping and brushing the final Hot Wax/Powder will best suit these conditions.

Created by Stephen White, Toko Tech Team member since 2005.

Check the [Wax Tips](#) page at [TokoUS.com](#) before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at [TokoUS.com](#).
