

WAX RECOMMENDATION

HIHTO RELAYS

Battle Creek Regional Park, St. Paul, MN – Wednesday, Jan 1

11 A.M., 10k Freestyle

Mass start, 2-person relay, each skier does two 2.5k laps

Event details [here](#)

Forecast/Conditions: Rain and temperatures above 32 through Monday have and will create significant free moisture in the snow that will freeze late Tuesday into Wednesday. Tuesday overnight low of 18 rising to 20 at the start. Mostly cloudy. The course has been reduced to 3 inches of manmade snow which should be machine worked prior to the race and be fast, although we expect more dirt than usual for this early in the season.

Glidewax: Apply HP Blue Hot Wax, scrape and brush, spray on HP Liquid Paraffin Red, let stand at least 2-4 hours, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP, apply BP Blue Hot Wax, scrape and brush, then apply HP Red Hot Wax, scrape and brush.

Structure: A fine or universal structure covered by one pass with the Blue Structurite tool after scraping and brushing the final Hot Wax will best suit these conditions.

Check the [Wax Tips](#) page at [TokoUS.com](#) before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
