

WAX RECOMMENDATION

HOIGAARDS BREADSMITH RELAYS

Elm Creek Park Reserve, Maple Grove, MN – Saturday, Dec 14

8 A.M., 6 x 1.5k skate relay

Mass start

<https://www.facebook.com/events/1773222953504998>

Forecast/Conditions: Friday overnight low of 15 rising to 23 at the start. Venue is manmade snow, but there is a 75 percent chance of snow and freezing rain leading up to and during the race. Cloudy with mild winds.

Glidewax: Apply High Performance Blue Hot Wax, scrape and brush, spray on HP Liquid Paraffin Red, let stand at least 2-4 hours, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP, apply Base Performance Blue Hot Wax, scrape and brush, then apply HP Red Hot Wax, scrape and brush. If snow becomes super wet from freezing rain, apply HP LP Yellow at the start and ski on it wet.

Structure: A universal structure covered by one pass with the Red Structurite tool after scraping and brushing the final Hot Wax will best suit these conditions.

Racing-Service

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
