

# WAX RECOMMENDATION

## NEW YEAR'S EVE NIGHT RACE

Auburn Ski Club Training Center, Soda Springs, CA - Tuesday, Dec 31

5 P.M. 5k/3k/1k, Freestyle

Interval start

<https://www.asctrainingcenter.org/events-races/nordic-races/>

---

**Forecast/Conditions:** Morning low 16, temperature at start 26, with a daytime high of 35. New snow on Sunday should make for great racing conditions. Mostly clear with light east winds on race evening will keep the snow cold.

**Glidewax:** Apply HP Blue Hot Wax, scrape and brush, spray on HP Liquid Paraffin Red, let stand at least 2-4 hours, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP, apply BP Blue Hot Wax, scrape and brush, then apply HP Red Hot Wax/HP Blue Hot Wax mixed 1:1, scrape and brush.

**Gripwax:** N/A

**Structure:** A universal structure covered by one pass with the Red Structurite tool after scraping and brushing the final Hot Wax will best suit these conditions.

Check the [Wax Tips](#) page at [TokoUS.com](http://TokoUS.com) before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
