

WAX RECOMMENDATION

SKI RODEO

Liberty Bell High School McCabe Trails, Winthrop, WA - Saturday, Dec 28

9:30 A.M. first race, 12:45 PM. last race, Freestyle technique

Mass start by distance 15k/10k/3k, 15k = 3 laps

<https://methowvalleynordic.com>

Forecast/Conditions: Overnight low of 27 with a daytime high Saturday of 36. A 60 percent chance of rain/snow falling during the event. Wet snowfall in the days leading up to the event should be groomed to a firm and fast platform. Multiple laps should cause some platform breakdown by race completion.

Glidewax: Apply HP Red Hot Wax, scrape and brush, spray on HP Liquid Paraffin Yellow, let stand at least 2 hours, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP, apply BP Red Hot Wax, scrape and brush, then apply HP Yellow Hot Wax, scrape and brush. Washington Cup participants are asked to use Base Performance level products.

Gripwax: N/A

Structure: A universal structure covered by one pass with the Yellow Structurite tool after scraping and brushing the final Hot Wax will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
