

WAX RECOMMENDATION

ARIENS NORDIC INVITE SALOMON CXC CUP

Ariens Nordic Center, Brillion, WI - Sunday, Jan 19

9 A.M., 5k, Skate

Interval start, multiple laps

<https://www.cxcskiing.org/>

Forecast/Conditions: Temperatures will be steadily dropping from highs in the 20s Saturday to around zero F Sunday morning. Expect a race time temperature of zero F to feel much colder due to high winds. The trail is firm older manmade snow that will slowly breakdown with heavy lap traffic.

Glidewax: If you have HP Blue Powder, this will be an excellent time to use it. Apply Performance Blue Hot Wax, scrape and brush, then apply HP Blue Powder, scrape and brush. If you do not have HP Blue Powder, apply Performance Blue Hot Wax, scrape and brush, then apply HP Blue Hot Wax, sprinkle on X-Cold Powder, iron in together, scrape and brush.

Gripwax: n/a

Structure: A fine linear structure covered by one pass with the Blue Structurite tool after scraping and brushing the final Hot Wax will best suit these conditions.

Racing-Service

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
