

WAX RECOMMENDATION

WNSL SPRINT CHAMPIONSHIPS

Ariens Nordic Center, Brillion, WI - Sunday, Feb 2

9 A.M, 1k to 1.2k, Skate

Mixed starts – Multiple laps

<https://www.wisconsinxcski.org/sprint-championships/>

Forecast/Conditions: Temperature will be steadily dropping from highs around 30 Saturday to the mid-20s Sunday morning. Trace amounts of snow are expected to fall Saturday night. Expect race time temperature to start in the low 30s and rise toward 40 through the race day. The trail is firm older manmade snow with trace amounts of fresh snow mixed in that will breakdown with heavy lap traffic.

Glidewax: Apply HP Red Hot Wax, scrape and brush, spray on HP Liquid Paraffin Yellow, let stand 2 hours, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP, apply BP Red Hot Wax, scrape and brush, then apply HP Yellow Hot Wax, scrape and brush.

Gripwax: n/a

Structure: A universal structure covered by one pass with the Yellow Structurite tool after scraping and brushing the final Hot Wax will best suit these conditions.

Created by Ben Lund, Toko Tech Team member since 2000

Racing-Service

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
