

# WAX RECOMMENDATION

## BOYNE CLASSIC

Boyne Mountain Resort, Boyne Falls, MI - Sunday, Jan 26

10 A.M., 10k, Classic

Mass start, 1 Lap

<https://nordicskiracer.com/event-details.asp?id=3980>

---

**Forecast/Conditions:** The temperature will be dropping from 28 on Saturday afternoon to overnight low of 18, temperature at start of 18. Course is mostly hard-packed powder snow with some fresh snow mixed in. There is 50 percent chance of light snow overnight. Expect mostly cloudy skies on Sunday.

**Glidewax:** Apply HP Blue Hot Wax, scrape and brush, spray on HP Liquid Paraffin Red, let stand at least 2-4 hours, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP, apply BP Blue Hot Wax, scrape and brush, then apply HP Red Hot Wax, scrape and brush.

**Gripwax:** Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 3 light layers of Nordic GripWax Red, corking smooth between layers. Cover with 1 layer of Nordic GripWax Blue and cork smooth.

**Structure:** A fine structure covered by one pass with the Red Structurite tool after scraping and brushing the final Hot Wax will best suit these conditions.

Check the [Wax Tips](#) page at [TokoUS.com](http://TokoUS.com) before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
