

WAX RECOMMENDATION

BEECH NUTS JUNIOR NORDIC RACE

Nub's Nob, Harbor Springs, MI - Sunday, Jan 26

10 A.M., 1/2k, 1k, 2k, 3k, Freestyle/Classic

Mass start by class, 1 lap

<https://nordicskiracer.com/event-details.asp?id=3982>

Forecast/Conditions: The temperature will be dropping from 27 on Saturday afternoon to overnight low of 17, temperature at start of 18. Course is mostly hard-packed powder snow with some fresh snow mixed in. There is 50 percent chance of light snow overnight. Expect mostly cloudy skies on Sunday.

Glidewax: Apply BP Red Hot Wax, scrape and brush.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 2 light layers of Nordic GripWax Red, corking smooth between layers. Cover with 1 layer of Nordic GripWax Blue and cork smooth.

Structure: A fine structure covered by one pass with the Red Structurite tool after scraping and brushing the final Hot Wax will best suit these conditions.

Created by Nick Baic, Toko Tech Team member since 2007

Racing-Service

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
