

WAX RECOMMENDATION

BOGUS NIGHT SKATE

Bogus Basin, Boise, ID - Tuesday, Jan 28

5:30 P.M., 10k/5k/3k/1k, Skate

Mass start – 2 laps

<https://www.bbnt.ski/race>

Forecast/Conditions: Monday night clear with a low of 20 degrees. Clear and sunny Tuesday with a high of 25 and a race start temperature around 23 degrees. Track is firm and skiing fast. Course will be groomed with a PistenBully around 3 P.M. prior to the race.

Glidewax: Apply Base Performance Blue Hot Wax, scrape and brush. Then apply HP Blue Hot Wax, sprinkle on X-Cold Powder, iron in together, let cool, scrape and brush. Despite warmer daytime temperatures, cold and hard waxes have been working very well.

Gripwax: n/a

Structure: A universal structure covered by one pass with the Blue Structurite tool after scraping and brushing the final Hot Wax will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
