

# WAX RECOMMENDATION

## KRAZY KLASSIC

Huron Meadows Metropark, Brighton, MI - Sunday, Jan 12

10 A.M., 5-6k/12k, Freestyle

Wave start – 4 laps Juniors, 8 laps Seniors, 1.5k loop

<https://nordicskiracer.com>

---

**Forecast/Conditions:** Overnight low of 19, temperature at start of 24. Course is mostly hard packed icy manmade snow with some fresh snow mixed in. There is little chance of snow after Friday evening. Expect mostly cloudy skies.

**Glidewax:** Apply HP Blue Hot Wax, scrape and brush, spray on HP Liquid Paraffin Red, let stand at least 2-4 hours, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP, apply BP Blue Hot Wax, scrape and brush, then apply HP Blue Hot Wax, scrape and brush.

**Gripwax:** Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 4 light layers of Nordic GripWax Red, corking smooth between layers. For less kick, cover with 1 layer of Nordic GripWax Blue and cork smooth.

**Structure:** A fine structure covered by one pass with the Blue Structurite tool after scraping and brushing the final Hot Wax will best suit these conditions.

Check the [Wax Tips](#) page at [TokoUS.com](https://TokoUS.com) before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at [TokoUS.com](https://TokoUS.com).
