

WAX RECOMMENDATION

LOW-PET LAW-PET CHALLENGE

Theo Wirth Park, Minneapolis, MN – Sunday, Jan 12

8:30 A.M., 5k and 10k, Freestyle

Mass start, 5k laps

<https://www.loppet.org/events/preloppet>

Forecast/Conditions: Overnight low of 21 should remain the temperature throughout the race. Manmade snow may have a dusting of natural snow mixed in. Expect a solid base at the beginning to turn into sugar snow on uphill with skier traffic.

Glidewax: Apply HP Blue Hot Wax, scrape and brush, spray on HP Liquid Paraffin Red, let stand at least 2-4 hours, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP, apply BP Blue Hot Wax, scrape and brush, then apply HP Red Hot Wax, scrape and brush.

Structure: A fine or universal structure covered by one pass with the Blue Structurite tool after scraping and brushing the final Hot Wax will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
