

WAX RECOMMENDATION

TOUR OF ANCHORAGE

Kincaid Park, Anchorage, AK - Sunday, March 2

Please check the event website for start times, distances, and waves. This year due to low snow conditions the event will be laps/loops within Kincaid Park

<https://anchoragenordicski.com/events/tour-of-anchorage/>

Forecast/Conditions: The overnight low is expected to be 30. The high during the day is expected to be 35. The air temperature at start time is expected to be about 35 with the snow temp around 30. The snow is almost exclusively manmade as there has been no measurable snow in Anchorage since early December. There is an 80 percent chance of rain between 6 A.M. and 6 P.M.

Glidewax: Apply BP Blue Hot Wax, scrape and brush, then apply HP Red Hot Wax, scrape and brush. Sprinkle on [Jet Powder](#) Red, make two passes with iron at 180c, let cool, scrape and brush. Polish with a merino wool roller. Then spray on [Jet Liquid](#) Red, let the ski dry flat for at least 20 minutes. No need to brush or polish Jet Liquid before skiing.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 2-4 layers of Nordic GripWax Red, corking smooth between layers.

Structure: A universal structure covered by one pass with the Red Structurite tool after scraping and brushing the final Hot Wax or Jet Powder but before applying Jet Liquid will best suit these conditions.

Created by Patrick McGownd Toko Tech Team member since 1998

Racing-Service

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Blue, Red or Yellow), as the temperature ranges are the same. For a more economical option, omit Jet topcoats. All Race Wax Tips recommend ONLY fluorine-free products. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
