

# WAX RECOMMENDATION

## RACE FOR SNOW

Weston Ski Track, Weston, MA - Saturday, Feb 8

6:30 P.M., 10k, Skate

Mass start, three laps

<https://theraceforsnow.wixsite.com/2025>

---

**Forecast/Conditions:** Daytime high of 34 dropping to 28 by race start. Manmade snow well-groomed with a PistenBully. Moderate northwest wind. Snow arriving later in the evening so watch for forecast changes.

**Glidewax:** Apply HP Red Hot Wax, sprinkle on X-Cold Powder, iron in together, scrape and brush, spray on HP Liquid Paraffin Red, let stand at least 2-4 hours, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP, apply BP Red Hot Wax, scrape and brush, then apply HP Red Hot Wax, scrape and brush.

**Gripwax:** N/A

**Structure:** A universal structure covered by one pass with the Red Structurite tool after scraping and brushing the final Hot Wax will best suit these conditions.

Check the [Wax Tips](#) page at [TokoUS.com](http://TokoUS.com) before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
