

WAX RECOMMENDATION

WASHINGTON BIATHLON ASSOCIATION WEEKEND #4

Stevens Pass Nordic Center, Stevens Pass, WA - Sunday, April 6

10:30 A.M. Zero, 11:30 A.M. Race, Freestyle

Wave start, mixed relay

<http://www.kongsbergers.org/>

Forecast/Conditions: Overnight low of 38 degrees with a start time temperature around 53 rising to 56 by the end of the party! Mostly cloudy skies are predicted with a very slight chance of some drizzle by the end of the day. Expect very soft conditions with the likelihood that Sunday morning grooming will not restore much firmness to the platform.

Glidewax: Apply BP Red Hot Wax, scrape and brush, then apply HP Yellow Hot Wax, scrape and brush. Sprinkle on [Jet Powder](#) Yellow, make two passes with iron at 180c, let cool, scrape and brush. Polish with a merino wool roller. Then spray on [Jet Liquid](#) Yellow and let the ski dry flat for at least 20 minutes. No need to brush or polish Jet Liquid before skiing. If choosing to continue to use the prior day's hot waxings, brush and wipe clean the prior day's accumulated dirt, reapply Jet Liquid Yellow and let the ski dry flat for at least 20 minutes. This can also be done the night before.

Gripwax: N/A

Structure: A Universal or Wet structure covered by one pass with the Yellow Structurite tool after scraping and brushing the final Hot Wax or Jet Powder but before applying Jet Liquid will best suit these conditions.

Racing-Service

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Blue, Red or Yellow), as the temperature ranges are the same. For a more economical option, omit Jet topcoats. All Race Wax Tips recommend ONLY fluorine-free products. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
