MAMMOTH MARATHON – Updated!

Mammoth Lakes, CA - Sunday, April 6

9 A.M., 42k/21k/10k, Freestyle

Mass start per distance, multiple loops per distance

<https://www.mammothmountain.com/things-to-do/events/mammoth-marathon-xc>

Forecast/Conditions: Overnight low 26, temperature at start 35, with a high of 46. Expect snow temperature to be 28-32 with transforming snow in the sun. Partly cloudy and light winds on race day. New snow and cool temperatures earlier in the week plus winds and elevation will keep the snow skiing colder. By all measures, an excellent day for a ski race.

Glidewax: Apply HP Blue Hot Wax, scrape and brush. Sprinkle on [Jet Powder](#) Yellow and make two passes with iron at 160c, let cool, scrape and brush. Polish with a merino wool roller. Then spray on [Jet Liquid](#) Yellow, let the ski dry flat for at least 20 minutes then polish with a merino wool roller or nylon polishing brush. If you do not have Jet Powder or Jet Liquid, use HP Liquid Paraffin Yellow.

Gripwax: N/A

Structure: A universal structure covered by one pass with the Yellow Structurite tool after scraping and brushing the final Hot Wax will best suit these conditions.

Racing-Service

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
