

WAX RECOMMENDATION

WISCONSIN BIATHLON RACE SERIES #2

Blackhawk Ski Club, Middleton, WI -- Sunday, Dec 14

9 A.M. Zero, 9:45 A.M. Race, multiple distances, Skate

Interval start – multiple laps

<https://www.webscorer.com/register?raceid=413204>

Forecast/Conditions: Saturday night low is expected to be single digits below zero F with race time temperature around zero F and partly sunny. A thin layer of Mother Nature's best fresh snow will create a hard, fast skate deck. Expect some debris due to the thin snow conditions. Expect slow, dry snow that will slowly loosen up with lap traffic.

Glidewax: Apply HP Blue Hot Wax, scrape and brush, sprinkle on [Jet Powder](#) Blue, make two passes with iron at 180c, let cool, scrape and brush using the copper brush and polish with a merino wool roller.

Gripwax: N/A

Structure: A fine structure covered by one pass with the Blue Structurite tool after scraping and brushing the final Hot Wax or polishing the Jet Powder will best suit these conditions.

Created by Ben Lund, Toko Tech Team member since 2000

Racing-Service

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Blue, Red or Yellow), as the temperature ranges are the same. For a more economical option, omit Jet topcoats. All Race Wax Tips recommend ONLY fluorine-free products. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
