

# WAX RECOMMENDATION

## McCALL RE-MASTERED

**Bear Basin, McCall, ID -- Saturday, Jan 24**

10 A.M., 31.5k/21k/10.5k, Skate

Wave start, 1-3 laps

<https://www.mccallnordic.com/racing/remastered/>

---

**Forecast/Conditions:** Friday night low in single digits F. Saturday will be mostly clear with the race start temperature in the low teens and a high of 25. Course is firm and fast with dry and abrasive snow. Cold waxes have been gliding very well throughout the week.

**Glidewax:** Apply HP Blue Hot Wax, sprinkle on X-Cold Powder, iron in together, scrape and brush, then sprinkle on [Jet Powder](#) Blue and make two passes with iron at 180c, let cool, scrape and brush using the copper brush and polish with a merino wool roller.

**Structure:** A fine structure covered by one pass with the Blue Structurite tool after scraping and brushing the final Hot Wax or polishing the Jet Powder will best suit these conditions.

Check the [Wax Tips](#) page at [TokoUS.com](#) before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Blue, Red or Yellow), as the temperature ranges are the same. For a more economical option, omit Jet topcoats. All Race Wax Tips recommend ONLY fluorine-free products. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
