1 P.M. 5k, Classical technique

Interval start, 1 skier every 30 seconds

<https://www.skireg.com/gore-mountain-jnq-nyssra-classic>

---

**Forecast/Conditions:** Overnight low -12F, temperature at start 1F with a light wind making wind chill well below zero F. Very dry snow conditions, PistenBully groomed track.

**Glidewax:** Apply HP Blue Hot Wax, scrape and brush, sprinkle on X-Cold Powder/Jet Powder Blue mixed 1:1, make two passes with iron at 180c, let cool, scrape and brush using the copper brush and polish with a merino wool roller.

**Gripwax:** Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 2-4 layers of Nordic GripWax X-Cold, corking smooth between layers.

**Structure:** A fine structure covered by one pass with the Blue Structurite tool after scraping and brushing the final Hot Wax will best suit these conditions.

Check the [Wax Tips](#) page at [TokoUS.com](#) before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Blue, Red or Yellow), as the temperature ranges are the same. For a more economical option, omit Jet topcoats. All Race Wax Tips recommend ONLY fluorine-free products. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
