

WAX RECOMMENDATION

SODA SPRINGS SPARKLE SKATE SPRINT

Royal Gorge XC Center, Soda Springs, CA -- Friday, Jan 16

6 P.M., 1k, Skate, Night race under the lights

Interval start with Heats to follow

<https://farwestnordic.org/wp-content/uploads/2026/01/FridayNightLights.pdf>

Forecast/Conditions: Morning low of 28, temperature at start 38 after a daytime high of 48. Mostly clear and dark with light winds. Expect glazed, transformed and transforming snow.

Glidewax: Apply HP Red Hot Wax, scrape and brush, go ski. This is a fun race so we are keeping the waxing simple. If you want to add a topcoat, use Toko Jet Liquid Red. (Quickly spray {about 2 to 3 seconds} [Jet Liquid](#) Red tail to tip, let sit for 10 minutes, go ski.)

Gripwax: N/A

Structure: A universal structure covered by one pass with the Red Structurite tool after scraping and brushing the final Hot Wax but before applying Jet Liquid will best suit these conditions.

Created by Ben Grasseschi, Toko Tech Team member since 2003

Racing-Service

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Blue, Red or Yellow), as the temperature ranges are the same. For a more economical option, omit Jet topcoats. All Race Wax Tips recommend ONLY fluorine-free products. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
