

WAX RECOMMENDATION

WISCONSIN STATE SPRINT CHAMPIONSHIPS

Ariens Nordic Center, Brillion, WI – Saturday, Jan 31

8:30 A.M., 1k/ 0.8k, Skate

Interval and Mass starts, 1 lap

<https://www.wisconsinxcski.org/sprint-championships/>

Forecast/Conditions: Friday night low in the high single digits F. Expect a firm skate deck of well machined manmade and natural snow that will glaze and break down in heavy skier traffic. Temperature for the early races will start around 10F and slowly climb into the mid- to high teens for the afternoon races with partly sunny skies.

Glidewax: Apply HP Blue Hot Wax, scrape and brush, lightly rub on Jet Bloc Red, polish with the Rotary Brush Merino Wool, repeat the Jet Bloc rub/polish for a second coat. Then quickly (about 2 to 3 seconds) spray [Jet Liquid](#) Red tail to tip, let sit for 10 minutes, go ski. If you do not have Jet Liquid, repeat the light Jet Bloc application and polishing process between heats.

Gripwax: N/A

Structure: A fine structure covered by one pass with the Blue Structurite tool after scraping and brushing the final Hot Wax or polishing the Jet Bloc but before applying Jet Liquid will best suit these conditions.

Racing-Service

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Blue, Red or Yellow), as the temperature ranges are the same. For a more economical option, omit Jet topcoats. All Race Wax Tips recommend ONLY fluorine-free products. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
