

WAX RECOMMENDATION

PALISADES HUT HEADLAMP HUFF

Royal Gorge XC Center, Soda Springs, CA – Friday, Feb 6

6 P.M, Uphill climb to Palisades Hut

Mass start, point-to-point

<https://farwestnordic.org/wp-content/uploads/2026/01/FridayNightLights.pdf>

Forecast/Conditions: Morning low 32, daytime high 49, and temperature at start 42. Expect transformed, glazed, and slightly dirty spring-like snow. Forecast calls for mostly cloudy and windy.

Glidewax: Since this race is a fun event and mostly uphill, we will keep the waxing simple: Apply HP Red Hot Wax/HP Yellow Hot Wax mixed 1:1, scrape and brush, go forth and huff it up.

Gripwax: N/A

Structure: A universal structure covered by one pass with the Red Structurite tool after scraping and brushing the final Hot Wax will best suit these conditions.

Racing-Service

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Blue, Red or Yellow), as the temperature ranges are the same. For a more economical option, omit Jet topcoats. All Race Wax Tips recommend ONLY fluorine-free products. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
