

WAX RECOMMENDATION

SQUIRREL HILL LOOPY LOPPET

Minocqua Winter Park, Minocqua, WI – Saturday, Feb 28

10 A.M., 10.8k, Skate and Classic, shorter races to follow
3 laps

<https://minocquawinterpark.org/events/loopy-loppet/>

Forecast/Conditions: Overnight low of 6F, temperature at start will be around 15. Expect colder glazed snow, with cloud cover for most of the day. Leaves and some dirt will be present.

Glidewax: Apply HP Blue Hot Wax, scrape and brush, sprinkle on [Jet Powder](#) Blue, make two passes with iron at 180c, let cool, scrape and brush using the copper brush and polish with a merino wool roller. Then quickly 2 seconds, spray [Jet Liquid](#) Red tail to tip, spread and polish using a handheld Thermo Cork, and go ski.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 2-4 layers of Nordic GripWax Blue, corking smooth between layers. For racers wanting more kick, cover GripWax Blue with 1-2 layers of GripWax Red.

Structure: A fine linear structure covered by one pass with the Red Structurite tool after scraping and brushing the final Hot Wax or polishing the Jet Powder but before applying Jet Liquid will best suit these conditions.

Racing-Service

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Blue, Red or Yellow), as the temperature ranges are the same. For a more economical option, omit Jet topcoats. All Race Wax Tips recommend ONLY fluorine-free products. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
