

WAX RECOMMENDATION

EASTER BUNNY HOPPET

Swedetown Trails, Calumet, MI – Saturday, April 11

9 A.M., 18k/13k, Freestyle

Mass, start, one lap

<https://swedetowntrails.org/>

Forecast/Conditions: Friday night mostly clear with a low around 27. Saturday sunny with race temperatures 31-33. Expect spring conditions with a mix of tilled powder and lightly transformed snow.

Glidewax: Apply HP Yellow Hot Wax, scrape and brush, sprinkle on [Jet Powder](#) Yellow, make two passes with iron at 180c, let cool, scrape and brush using the copper brush and polish with a merino wool roller. Then quickly (about 3 to 4 seconds) spray [Jet Liquid](#) Yellow tail to tip, let sit for 10 minutes, go ski.

Structure: A universal structure covered by one pass with the Yellow Structurite tool after scraping and brushing the final Hot Wax or polishing the Jet Powder but before applying Jet Liquid will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Blue, Red or Yellow), as the temperature ranges are the same. For a more economical option, omit Jet topcoats. All Race Wax Tips recommend ONLY fluorine-free products. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
